57, WOOD STREET,
CHEAPSIDE,
LONDON, E.C.

IN compiling the Catalogue we have now the pleasure of placing before you, it has been our endeavour to give a brief summary of the large assortment of goods we keep in our forty Departments. No expense has been spared in our efforts to produce the engravings, fac-similes of the articles represented, and thus be a guide to our customers, more especially to our Colonial friends, in making out their orders.

The Catalogue now before you embraces designs of the very newest goods introduced up to the time of publication.

Each Department has a competent Buyer, who, after a special study for many years, has made himself acquainted with all the details of the manufacture of the goods which belong to his Department.

The prices quoted in this Catalogue are net, and subject to the fluctuations of the markets. Having but one fixed price throughout the whole of our establishment, we have endeavoured to gain, and trust have succeeded in gaining, the confidence of our customers. If a reduction in any article take place, the full benefit is given to the customer; and if any articles published in our Catalogue advance in price before the receipt of an order, the goods are sent in nearly every instance, so as not to disappoint the party or parties ordering, even if the execution of such an order entail a small loss.

By giving personal attention to all orders entrusted to us, prompt and correct execution is ensured. Special attention is at all times given to the packing of goods for the home and export trade.

We supply only *bonâ fide* shop-keepers, and the wholesale and shipping trade.

We would specially call the attention of customers to the notice on page 829 of this book referring to a Catalogue of some 729 pages, fully and most carefully illustrated, embracing almost every article necessary for house furnishing. The Catalogue there alluded to has no prices quoted under

the illustrations, the price list being printed separately from the book; so that any trader can place such Catalogue before parties requiring Furniture, &c., and arrange his own rate of profit, taking the orders from such illustrations with almost the same advantage as though he held a large stock of furniture, &c. We shall be pleased to supply a copy of our Furnishing Catalogue gratis to any *bonâ fide* trader who may consider it in our mutual interest to have such work in his possession.

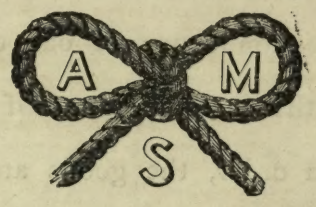

We are prepared to give Estimates for furnishing Private Houses or Hotels throughout, if you give us the necessary details; and you will thus be enabled to supply your intending customer with everything he may require in the furnishing line, at a moderate profit, as all the details of the execution of such an order will be done, when required, by us.

We should prefer to receive all orders from the Colonies through the medium of responsible firms established in Great Britain; otherwise orders must be accompanied by bankers' drafts or letters of credit authorising payment in London against delivery of bills of lading.

Orders sent by intending purchasers, resident in Great Britain, who have not an account with us should be accompanied by bankers' drafts or references to established firms in London.

Yours respectfully,

SILBER & FLEMING, LIMITED.

TRADE  MARK.

ALL PRICES QUOTED IN OUR PRICE LIST ARE NET, AND SUBJECT TO FLUCTUATION.

☞ Please do not cut out the Illustrations in this Catalogue, but, when ordering, quote name, number, and price, which will be quite sufficient to indicate the article required.

It is impossible to give the exact weight of Sterling Silver Forks, Spoons, &c., as scarcely any two dozen weigh alike. We have, therefore, given the approximate weight, and the prices will vary according to the weight.

Salt Spoons, Mustard Spoons, Sugar Tongs, Moist Sugar Spoons, Egg Spoons, and Marrow Spoons, in proportion to the above quotations,

When we ship new Silver we are able to obtain a drawback of 1/6 per ounce, provided the quantity shipped be not less than 25 ounces, and the sum so obtained by us, less expenses incurred, will be deducted from the invoice. On silver for use on board ships, and second-hand Silver, no drawback is allowed by the Government.

The Prices quoted for Spoons, Forks, &c. are strictly net.

L Cut Beads, sizes from Nos. 1 to 21, are a black bead, known as L Cut 3 times, and made in sizes as represented by drawing.

The quality and make of this bead vary so much that we are unable to give a fixed price, but are prepared to execute orders, charging a moderate profit on cost. A large stock always on hand. Drawing represents L Cut Beads, 5 times cut, of which we generally hold stock in all sizes, as shown in three times cut from Nos. 1 to 21. The shape and make of bead (as shown in drawing, sizes Nos. 1 to 21) is made in almost every colour. The usual colours sold are ruby, crystal, anna-green, anna-yellow, blue fine, opaque, amber, opal white, and opaque white.

Cut Garnets.

(In sizes and colours same as Seed Beads.)

Cut Garnets in sizes and colours of Seed Beads, for sizes, see drawing of Seed Beads. As the prices for these fine cut beads are regulated according to the supply and demand, we are unable to give fixed prices, but can always execute orders at the lowest possible prices of the day.

Pearl Beads, sizes from Nos. 1 to 18, are made in various qualities.

The qualities most saleable vary from 9/6 per gross strings, viz.:—12 bunches, each of 12 strings, to 36/- per gross strings.

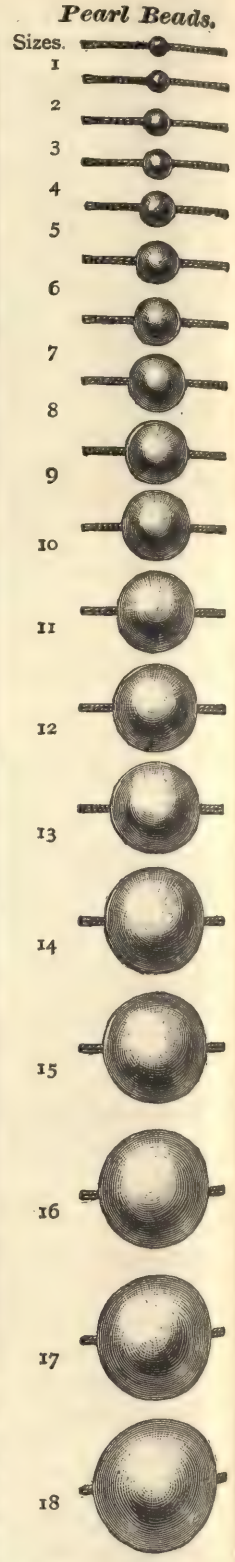

The better qualities vary from 18/- per gross strings to 8/- per bunch of 12 strings.

A superior quality varies from 5/6 to 27/- per bunch of 12 strings.

The prices are regulated according to the size of the Pearl Beads; the larger the size the higher the price, with the exception of Seed Pearls, Pearl Oats, Droppers, Sequins, &c., in all sizes. Solid Pearl, or Lustre Beads, from about 1/6 to 3/6 per 1,000 beads. The larger the size the higher the price. Pearls for the Indian market, solid filled, Roman and other Pearls.

WATCH MANUFACTURERS AND IMPORTERS.

NICKEL WATCHES.

We desire to call Special Attention to our Nickel Keyless Watches shown on page opposite. These are furnished with good Horizontal Movements for that description of watch, and although the prices quoted are exceedingly low, they are really good timekeepers, the movements being made by machinery which has been much improved during the last few years.

FOREIGN SILVER & GOLD WATCHES.

Of the Watches generally known as Foreign or Swiss, as distinguished from those of English manufacture, we are known to show the greatest variety and to sell at the most moderate prices, considering the quality of the Watches.

We are aware that inferior Watches are often sold at lower prices than those quoted by us, but every Watch we sell is carefully and thoroughly examined by most competent English workmen in our own factory, and this is no doubt the reason that our Watches command higher prices than those of an inferior make.

The Watches which you can thoroughly recommend to your customers as good timekeepers are :—

ENGLISH WATCHES.

For the last half-century Watchmakers and Watch Companies in every part of the globe have tried to improve upon and to surpass our own manufactures ; but yet, notwithstanding all these efforts, a good sound English Watch can not only meet every competition with regard to price, but is superior in make, solidity, and durability to the productions of every other country. The Silver Cases are Hall marked, thus offering a perfect guarantee of their being Sterling Silver; the Gold cases bear a Hall mark showing that they are made of 18-carat Gold ; the movements are not only celebrated for their solidity, but for the invariably careful and workmanlike finish shown in their construction.

The **KEYLESS WATCH**, although of foreign introduction, has been so much improved that its works, although complicated, can be relied upon equally as well as the ordinary Horizontal or Verge movements ; it is not more liable to get out of order than the simplest movement made half-a-century ago.

Our **CHRONOMETER** and **CALENDAR WATCHES** and **CHRONOGRAPHS** are made to suit all climates, as the movements have undergone the severest tests to protect them against extreme heat and cold.

The care and time spent on every watch to ensure its keeping exact time will enable you, when purchasing your watches from our establishment, to increase your trade and to give every satisfaction to your customers.

The salesmen and employés in this department are all practical watchmakers and have served at the bench.

PRESENTATION WATCHES

Presentation Watches can be engraved inside, on the dome, with the finest finish, at a few hours' notice, and are placed in velvet and silk-lined cases, with velvet or morocco leather covers.

Enamelling Crests, Coats of Arms, Monograms, and Initials on the outside of the cases can be executed in two or three days.

CLOCKS,

ENGLISH AND FOREIGN.

The Drawings of Clocks shown on the following pages will give but an indifferent idea of the large assortment regularly kept in stock by us, comprising—

Timepieces in wooden cases, square and fancy shaped.
Square and round Nickel Timepieces, with and without alarum.
American round Dial Clocks, with and without drop.
French Brass Drum Clocks.
English Skeleton Clocks.
Carved Wood Cuckoo and Sentry Clocks.
English round Dial Clocks, with and without drop.
Railway Dial Clocks.
Marine Clocks.
Tell-Tale or Watchmen's Clocks.
Real Vienna Regulators.

Real Bronze Gilt and Porcelain Clocks, with Vases or Candelabra to match.
Marble Clocks of every description.
Clocks in Bronze cases, with Vases to match.

Most of these Clocks are especially established by ourselves or made for us. Our large purchases enable us to sell these goods at very moderate prices

Photographs and description of any style or size forwarded on application.

All foreign clocks are examined at our establishment in Paris by competent clockmakers, and they are again carefully examined in our London workshops before being despatched to our customers.

We do not attempt to compete with the inferior class of goods of this kind, as we believe, and have found by experience, that our customers prefer to pay a small extra charge for movements of the very best kind, Clocks being of very little value when furnished with inferior and unreliable movements.

Estimates for Church, Turret, and other Clocks forwarded on application.

Presentation Clocks or Bronzes can be fitted with Brass, Silver, or Gold Inscription Plates at a few hours' notice

As we employ only the best packers, the risk of damage or breakage is minimised.

REAL AND IMITATION BRONZES.

REAL ORMOLU AND BRASS GOODS, MODERN AND ANTIQUE.

The few illustrations which we now beg to submit to you represent but a very small part of our large and well-assorted stock of modern and antique Brass, Bronze, and Ormolu Goods. In this class of goods we look more to the finish of the articles than to cheapness in price, and every piece will be found to be properly finished, notwithstanding that many of our prices are extraordinarily moderate.

The patterns of these goods vary, or are modified and improved, from time to time; the older designs disappearing from our stock in consequence of not being replaced, and the latest novelties, therefore, being constantly introduced to our customers. When ordering, kindly take these facts into consideration, and allow us to substitute the latest patterns at about the same price as those illustrated should we not have the latter in stock. If particularly desired, the very article as shown and described can be forwarded; but if not in stock, from two to three months will be required for the execution of your orders.

Pedestals for Bronze Figures, &c., can be supplied of any height in Wood or Marble, black or coloured; or the marble foot can be replaced by an Oak, Mahogany, or Ebony Pedestal.

Presentation Bronzes can be fitted with Brass, Silver, or Gold Inscription Plates at a few hours' notice.

When sending for an assortment, please say whether we may add to your order, and state how many pieces and at about what prices; this will enable you to bring under the notice of your customers the latest novelties produced in Europe in this class of goods. Scarcely a season passes without some specialities being introduced into the trade, and you will no doubt agree with us that it is of great advantage to our clients, especially those who are not able to visit our warehouses regularly every season, to be kept well supplied with new patterns, it being a well-established fact that novelties not only attract customers, but leave a fair margin of profit.

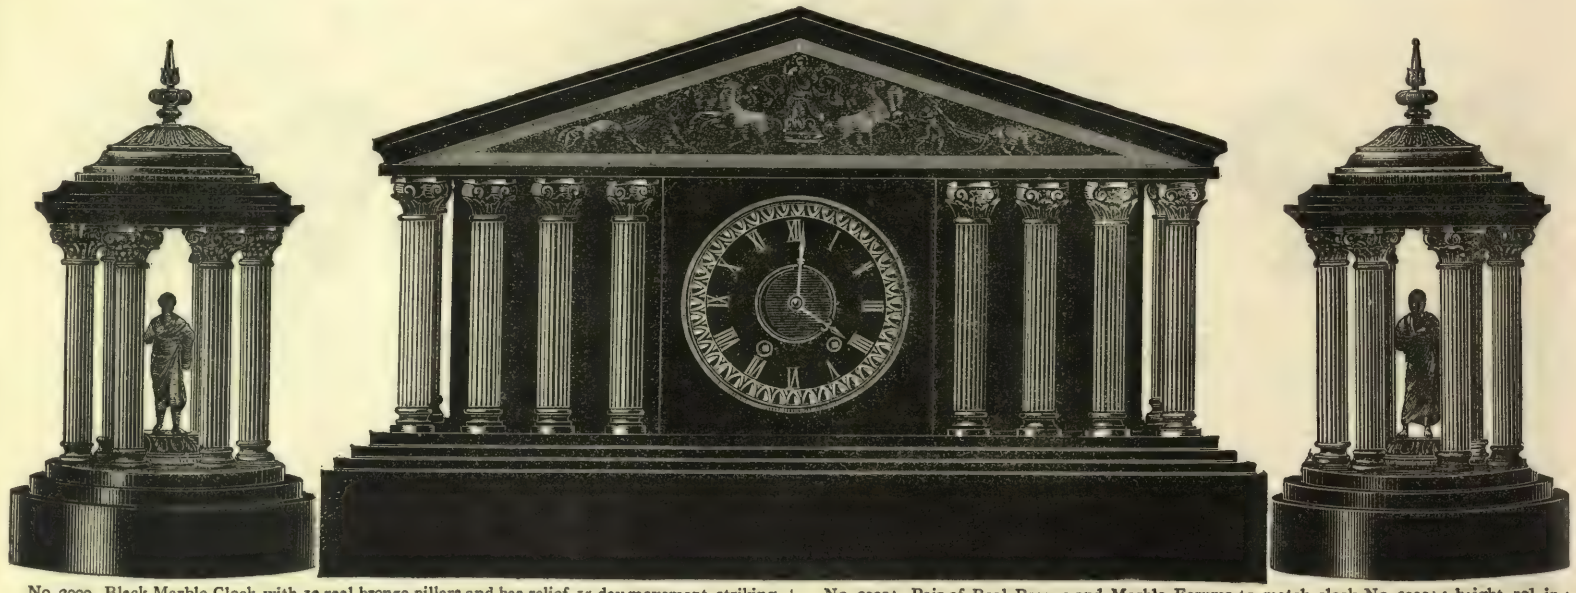

Photographs can be sent of special large pieces to fit into recesses and alcoves, or for standing in halls, with or without arrangement for lighting by means of gas, oil, or petroleum

MUSICAL BOXES,
PLUMED SINGING BIRDS,
MECHANICALLY-MOVING FIGURES,
WINDMILLS, &c.,
WITH MUSIC,
MUSICAL CHAIRS, CIGAR STANDS,
BIRD BOXES AND BIRDS IN CAGES.

The mechanism and finish of our Bird Boxes are of the highest order; the notes sung by the Birds are such close imitations of nature that the best connoisseurs are frequently deceived.

Mechanical Novelties can be fitted with automatic movement, at an extra cost of 20/- each, by which means the mechanism can be set in motion on dropping in a penny. Many hundreds of these Mechanical Pieces have been made by us, especially for exhibitions and places of public amusement.

Every description of Mechanically-moving Figures, &c., made to suit customers' own requirements. Estimates and designs forwarded on application.

☞ As almost every article represented in this Catalogue is kept in stock by us, and can in most cases be despatched within a few hours after the receipt of order, you will thus be enabled to supply your customers with the goods at the shortest notice.

The saloon is surrounded by mirrors, and is upholstered with crimson satin and gilt mouldings. The lady figure is richly dressed in blue satin with white lace trimmings and hat to match; she moves her head from right to left, and in her right hand holds a pair of eye-glasses, which she raises up and down, and in the left hand she holds a satin shoe, which she also raises as if to inspect it. The male figure is dressed in black silk, with gilt buttons and red silk scarf, and moves his head, eyes, and mouth as if speaking to his customer; with his right hand he moves a bronzed leather shoe on and off the lady's foot when she raises it. Two airs of music, £8 15s. each.

No. 2254. — **Monkey Gamblers.** — Mechanical Piece, under glass shade. Height, 26½ in.; length, 24 in. Two Monkey Figures, richly dressed in coloured satin, seated at a table, in a saloon surrounded by mirrors and upholstered in crimson satin, with black and gilt mouldings. Both figures move their heads, eyes, and mouths as if speaking to each other. One has in its right hand a cigar, which it raises to its mouth as if smoking; it also moves its left arm up and down. The other figure holds in its right hand a box, containing dice, which it raises and throws the dice out on the table, with its left hand it sweeps them off the table back again into the box, the numbers of the dice changing each time. Two airs of music, £11 11s. each.

No. 2255. — **Monkey Magician.** — Mechanical Piece, under glass shade, representing a Monkey Magician. Height, 27½ in.; length, 20 in. Monkey Figure, richly dressed in coloured satin with gilt braiding, standing at the back of a table, on which is placed a few conjurer's requisites; in each hand it holds a brass cover, which it constantly lifts up and down; each time it raises the cover different articles appear upon the table—viz., two white balls, two red balls, two green balls, two dice, and at the last change nothing appears under the covers. The whole piece under a handsome canopy of flowers. Two airs of music, £6 15s. each.

No. 2256.—**Monkey Eating.**—Mechanical Piece, under glass shade, representing Monkey Figure eating. Height, 26½ in.; length, 20 in. The figure seated at table, under a canopy of flowers, is richly dressed in coloured satin with gilt buttons, and moves its head, eyes, and mouth; the right arm moves as if cutting the food, and with its left it lifts up to its mouth what it is supposed to be eating. Two airs of music, £5 5s. each.

No. 2257. — **Smith's Forge.** — Very effective Mechanical Piece, representing a Smith's Forge, with decorated cardboard figures. Two men making horse-shoes, one man shoeing horse, one man blowing bellows, which work in a very natural manner; the horse and dog moving their heads and tails. The whole piece in wooden case with richly gilt and black frame, with glass in front, playing two airs of music. Size, about 36 in. long, 25 in. high, £6 15s. each.

No. 2258.—**Monkey Trombone Player.**—Full-sized Monkey, decorated with fancy coloured beads, &c., moving the slide of trombone in a most natural manner, also moving its eyes and lips, and turning its head from side to side as if in the act of speaking. Playing one air. This piece causes great amusement, £4 7s. 6d. each.

No. 2259. — **Mechanical Rope Dancer.** — Mechanical Rope Dancer, under glass shade, either male or female figure, dancing very naturally on rope, with a musician at each side playing miniature musical instruments. Surrounded by trees rich with foliage. 8-day clock movement. Playing two airs. Height, 28 in.; length, 20 in., £12 12s. each.

No. 2260.—**Monkey Concert.**—Very effective Mechanical Piece, representing a Monkey Concert, with decorated cardboard figures. One monkey is beating time, one playing a drum, one playing a violin, another a double bass viol, and a dog moves its head and tail. No. 2261.—**Mechanical Chinaman.**—Mechanical Novelty, specially adapted for the Tea and Grocery trades. Height, 26¾ in.; length, 24 in. Figure representing a Chinaman richly dressed in green and crimson satin, embroidered with gold lace. Height of figure, 21¼ in. The figure moves its head, eyes, mouth, and arm. The tin canister in front of the figure contains four tablets, which revolve apparently at the direction of the Chinaman's wand, only one tablet being exposed to view at one time. The tablets being movable can be written upon to suit any style of advertisement required. Playing two airs, £8 15s. each.

No. 2262.—**Mechanical Bird Tree.**—Large Tree, under glass shade, on black polished wood stand. Two birds flying from branch to branch, one bird at the top of the tree moving its wings and head; imitation water apparently running from rock at base into a pond, upon which are four ducks and one swan, the latter swimming round the pond, and one duck moving about. The birds chirping in a natural note. 15-day striking clock. Height, 28½ in.; length, 23 in., £8 15s. each.

No. 2263.—**Lady Pianist.**—Mechanical Piece, under glass shade, representing a Lady Pianist. Height, 26½ in.; length, 20 in. The piano is placed in a saloon surrounded by mirrors, and upholstered with blue satin and gilt mouldings. The lady figure is richly dressed in satin with white lace and gold braid trimmings; she moves both arms as if playing the piano, and also moves her head very gracefully. Seated on the top of the piano is a figure of a little girl with a doll, which she dances up and down to the music. Two airs of music, £5 15s. each.

No. 2264.—**Monkey Nurse.**—Mechanical Piece, under glass shade with canopy of flowers, representing a Monkey Nurse with Baby. The nurse is dressed in blue and red satin, with white apron, and white lace cap, and is apparently feeding the baby with a feeding bottle. Two airs of music. Height, 26 in.; length, 20 in., £6 6s. each

No. 2265.—**Monkey Fisherman.**—Mechanical Piece, under glass shade, representing a Monkey Fisherman, seated on a bank, apparently smoking and fishing in a most natural manner. Two airs of music. Height, 26½ in.; length, 20 in., £5 10s. each.

No. 2266. — **Monkey Conjurer.** — Mechanical Piece, under glass shade, representing a Monkey Conjurer. Height, 28 in.; length, 19 in. Richly dressed Monkey figure, standing at the back of a table, upon which is placed a small glass shade with three dice underneath; in its right hand the figure is holding a brass cover which it places over the shade, and then lifts it up again, the numbers on the dice changing meanwhile. The whole piece under a handsome canopy of flowers. Two airs of music, £5 5s. each.

No. 2267.—**Lady Preparing for a Ball.**—Mechanical Piece, under glass shade, representing Lady preparing for a Ball. Height, 26½ in.; length, 23 in. The lady figure is seated in front of a looking-glass in a boudoir, which is richly hung with satin curtains. She moves her head, and in her right hand holds a powder puff, which she constantly raises to her face, and also moves her left hand up from and down to the table. Two airs of music, £5 15s. each.

NOTE.—Every Mechanical Piece is thoroughly examined and oiled in our own Workshops on the Premises before being dispatched to our Customers.

— DIRECTIONS FOR USE. —

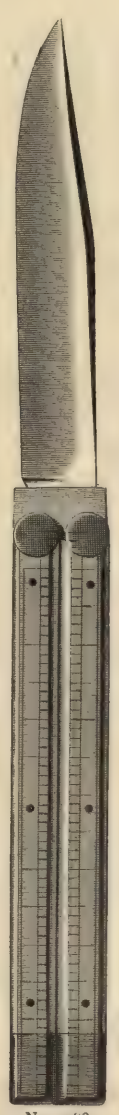

Simply slide and press back the nickel silver button on the handle, the blade will then spring open and become locked, by sliding back the button it will make it impossible for it to close and injure the hand when in use. To close the knife, slide back and press the button, and fold the blade into the handle, again slide back the button and it will prevent it opening in the pocket.

TRADE MARK

The principal advantages of the Patent Springless Clasp Pocket Knives over the ordinary Spring Knives are as follows: They can be opened and shut with the greatest ease without the aid of the thumb nail, which so often gets injured through the force required to open the ordinary Spring Knives. When open and in use the blade cannot possibly shut, thereby preventing accidents which so frequently occur with the ordinary pocket knives, through the blades closing while being used. When closed the blade is entirely covered by the handle, which protects it from rust or from damaging the pockets, or articles with which it may come in contact

MICROSCOPES.

The following is a list of high-class microscopes suitable for use in the laboratory or study. They are all of the very highest quality and workmanship, and the optical parts are especially perfect.

No. 4123A. Crane Arm Binocular Microscope, 2 pair eye-pieces, live box (as drawing), forceps, condenser, 2-in., 1-in., and ¼-in. objectives, case complete, £15 6s. 6d. each.

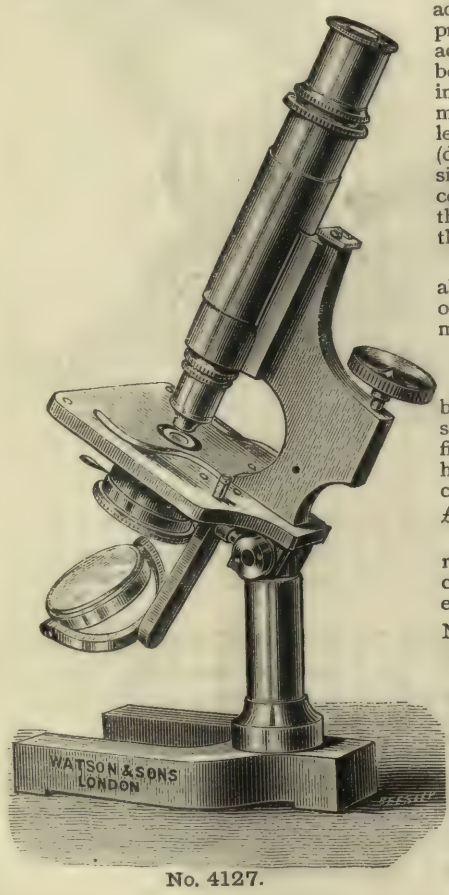

No. 4126. Monocular Microscope (as illustrated), having rackwork coarse and fine adjustments to focus, universal sliding stage, double mirror mounted on jointed arm to permit of oblique illumination for draw-tube, clamp to tighten the instrument at any angle, fitted with 2-in. and ½-in. objectives, "B" eye-piece, stand condenser, live cage, forceps, polariscope and selenite, complete in mahogany cabinet, £7 10s. each.

No. 4124. Crane Arm Microscope, with mechanical double stage and sliding bar, A and B eye-pieces, diaphragm, condenser, live box, forceps, polariscope, spot lens, light modifier, in case, with 1¼-in. objectives (as drawing), £12 13s. each.

No. 4125. Microscope, fitted as No. 4124, without the mechanical stage, but with circular concentric stage, £8 6s. 6d. each.

No. 4124.

No. 4127.

No. 4127. The "University" Microscope. This instrument is designed especially for students, and is thoroughly first-rate. It has the following special advantages:—It is fitted with an improved form of fine adjustment, which acts by means of a lever on the entire body, permitting of the utmost delicacy in focussing without the least lateral motion. The Body is of the Continental length, but is fitted with a draw-tube (divided to centimetres), which extends to the full English size, 10 in. The Stage is of extra large size and affords convenience for the use of very large slips. The Foot is of the popular Continental pattern, extremely solid, rendering the instrument very firm and steady.

The fitting for under-stage apparatus is hung on a pivot allowing of it and the apparatus contained in it to be at once turned aside (permitting of direct light from the mirror), and replaced.

The instrument is made in two forms, *i.e.*—

No. 4127. As illustrated and described, with sliding body, coarse adjustment, double mirror mounted on swinging tail-piece for obtaining oblique illumination, fitted with 2 eye-pieces, nickel-plated to prevent tarnishing, high quality, 1-in. and ⅙-in. objectives, Abbé pattern condenser and set of stops, complete, in mahogany case, £7 15s. each.

No. 4128. Precisely similar to No. 4127, but having rackwork coarse adjustment to replace the sliding tube, complete as above-mentioned, in mahogany case, £8 15s. each.

No. 4129. Binocular Instrument as illustrated, with rackwork coarse and improved form of fine adjustment, rackwork to draw-tubes, concentric rotating stage with mechanical movements, extra large double mirror mounted on swinging arm for oblique illumination, sub-stage with screws to centre and rackwork to raise and lower, mounted on extremely rigid foot, very highest quality and finish throughout, fitted with 1 pair of eye-pieces, £15 2s. each. This is an exceedingly handsome full-size instrument, replete with every mechanical convenience.

No. 4130. Monocular Instrument, with 1 eye-piece, exactly similar to above, £12 12s. each.

No. 4129.

MICROSCOPES AND APPARATUS.

No 4131.

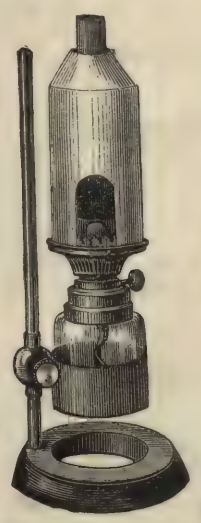

No. 4131. Full size, extremely solid Microscope, as illustrated, with rackwork coarse adjustment, improved form of fine adjustment, universal sliding stage, wheel of stops, double mirror mounted on swinging tail-piece to permit of oblique illumination, fitted with "B" eye-piece, ⅛-in. and 1-in., high-class objectives, stand condenser, and mahogany cabinet, £8 15s.

Instrument exactly similar to above, but binocular, fitted with 2 eye-pieces, with rackwork adjustment to draw tubes, £11 10s.

This is a very popular and convenient instrument, and is suitable for all classes of study.

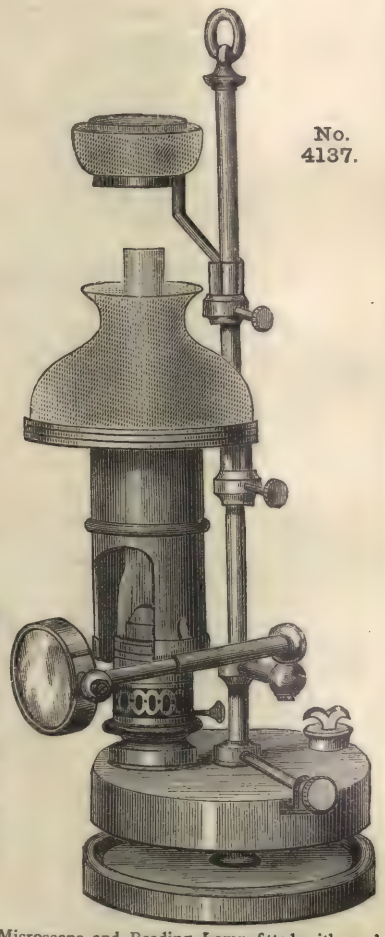

No. 4133. Condensers, on brass stand, 4/9, 8/-, 10/-, 12/6, 16/6, 22/6.

No. 4134. Microscope Lamp, with porous shade, complete, in tin box, 7/6 each.

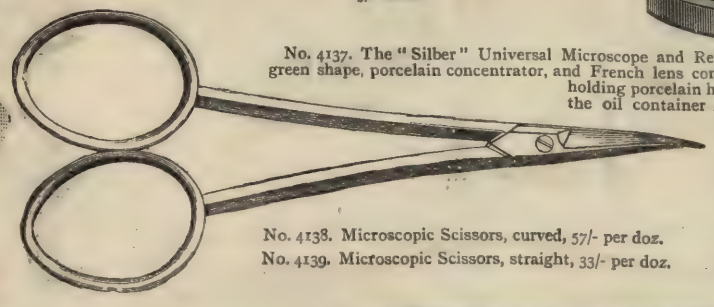

No. 4135. Microscope Lamp, superior quality, in pine-wood case (*see* drawing), 12/6 each.

No. 4136. Microscope Lamp very superior quality, complete, with porous shade, &c., in pine case, 15/- each.

No. 4137.

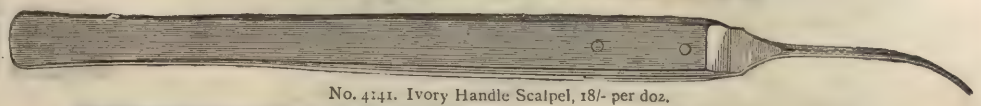

No. 4137. The "Silber" Universal Microscope and Reading Lamp, fitted with opal green shape, porcelain concentrator, and French lens condenser, and movable ring for holding porcelain hot-water bath or drying closet; the oil container and all other apparatus are capable of being raised or lowered as required, and when the oil container is resting on the foot the light is only 5½ in. from the table. Height to top of ring, 22 in. Can only be had for burning petroleum, paraffin, or kerosene. In japanned tin, 35/- each; lacquered brass, 84/- each.

No. 4138. Microscopic Scissors, curved, 57/- per doz.
No. 4139. Microscopic Scissors, straight, 33/- per doz.

No. 4140. Steel Spring Forceps, curved or straight, 30/- per doz.

THE "PREMIER" CAMERAS.

Made in the very highest quality and workmanship, with interchangeable parts, so that the dark slides, fronts, and screw nuts, made for one camera, will fit any other for the same size plates, and duplicates can at any time be obtained without the necessity of sending the camera to be fitted.

They have double extension to focus, giving a very long range, adjusted by rackwork or screw (the larger sizes, from 12 by 10 upwards, are always made to adjust by screw, the size being too large for a rack to act properly, but from 10 by 8 downwards the rack is used; if, however, a screw be preferred, any Camera may be had with this adjustment (instead of the rack), double swinging back, giving motions in both horizontal and vertical directions, rising, falling, and sliding front (2 fronts), leather bellows body, folding base board, and reversing frame at back, so that the dark slides may be placed either upright or horizontally without moving the Camera.

Included with each Camera are three double dark slides, the shutters of which have patent stops and patent spring fasteners; and all sizes, from ½ plate to 8½ by 6½, have a moveable central partition, so that they may be used for stereoscopic pictures if desired.

THE "ACME" TOURIST'S CAMERA.

Recommended as the most perfect Traveller's Camera extant, being exceedingly light and portable though perfectly strong and rigid, and with convenience beyond any other form of Camera.

Camera full extended.

Camera extended at short range for use with a wide angle lens, showing no projecting base board to cut off the view.

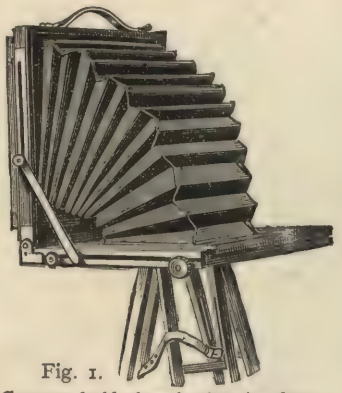

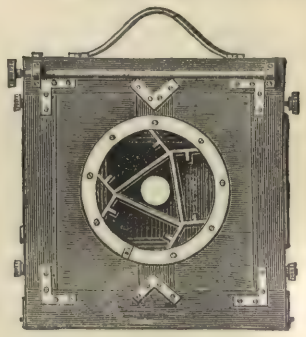

Fig. 1.

Camera half closed, showing how the front shuts into the base.

Camera closed, showing the tripod top permanently attached to base of Camera.

TO SET UP THE "ACME" CAMERA.

Attach the tripod legs to the head, which is done in the usual manner—viz., there are pins projecting on the metal top which fit into sockets on each side of the stand legs, and the legs are held stiff by a strut pushed between them.

Move aside the spring on the top of the body, which will allow the body to be lifted from the base to the position of Fig. 1. The struts will then run down in the grooves in the side, till they fall into a niche near the bottom, and by tightening the clamping nuts in this position, the body will be held at right angles to the base. Lift up the front, and two projections will be seen at the foot, one on each side. These slip easily into grooves, cut to fit them in the front of the base, and are held there by spring latches which rise and secure them. Set the front so that the clamping screw of the brass strut is in the niche which will be seen therein, and the front will then be at right angles to the base and parallel to the back. The camera is now ready for use.

To close the camera, first see that the body is drawn right back to the end of the baseboard, and clamped there by its binding screws, as, if it is not, the camera cannot close square; loosen the screws that brace the front, then incline the front backward to an angle of about 45°, and it will draw out loosely from its fittings; turn it over and lay it flat against the baseboard—it will be necessary to press in the ratchet-lever that fixes the rising portion of front to do this; then unclamp the screws of the struts to the body, close the body upon the base, and as soon as closed a spring grips it and keeps it shut. The whole operation of either opening or closing should not occupy thirty seconds.

Included with each Camera are three double Dark Slides. If less or more are required, the cost of separate Slides, as per price list page 288, may be deducted or added.

UNIVERSAL STUDIO CAMERA.

TRADE MARK.

This Camera is perhaps the most useful Studio Camera extant. It has bellows body, extending in front by sliding and at back by endless screw, so that it has sufficient range to allow of its being used for the longest or shortest focus lens, and it may be used also for copying. It has swinging back and takes the size plates quoted either way, horizontal or vertical. Made in Spanish mahogany, leather bellows body, and of very best workmanship.

With one of these Cameras alone all the work of an ordinary studio may be done, and with much greater convenience than where two or three different Cameras are employed, the trouble of changing one size Camera for another being avoided.

No. 4474. For Plates 6½ by 4¾, may be used for either two cartes-de-visite on one plate, 6½ by 4¾, or one single picture on any size up to and including 6½ by 4¾, focus from 4½ in. to 18 in. £6 0 0

No. 4475. For Plates 8½ by 6½, will take two cabinets on 8½ by 6½, and two cartes-de-visite on 6½ by 4¾, or one picture on any size up to and including 8½ by 6½, length of focus from 5½ in. to 22 in. 7 7 0

No. 4476. For Plates 9 by 7, for either two cabinets or two cartes-de-visite, with carriers 8½ by 6½, and 6½ by 4¾, focus from 5½ in. to 22 in. 7 17 6

No. 4477. For Plates 10 by 8, for two boudoir portraits, two cabinets, or two cartes-de-visite, with carriers for 8½ by 6½, and 6½ by 4¾, focus from 6 to 24 in. 8 17 6

No. 4478. For Plates 12 by 10, with carriers 10 by 8, and 8½ by 6½ .. 10 15 0

No. 4479. For Plates 15 by 12, with carriers 12 by 10, and 10 by 8 .. 15 15 0

These Cameras may be supplied, if required, having double swinging back instead of vertical swing only. The cost would then be extra for Nos. 4474, 4475, £1; Nos. 4476, 4477, £1 5s.; No. 4478, £1 10s.; No. 4479, £2.

The focussing arrangement may, in small sizes, be by rack and pinion instead of endless screw, if preferred, at same prices.

Included with each Camera is one single slide and one inner frame, but double slides may be substituted, if preferred, at the difference in cost. For prices see page 288.

NEW COMPLETE STUDENTS' SETS OF PHOTOGRAPHIC APPARATUS.

No. A Set.—The Camera has leather bellows body, folding base, rackwork focussing adjustment, 3 double dark slides, and double action front. The lens is a single combination, with rotating diaphragms, and suitable for both groups and views.

EXTRA BACKS FOR CAMERAS.

Note.—The dark slides quoted below, and all supplied by us, excepting those with the Student's Sets Apparatus, have now the shutters fitted with patent spring catches at top to keep them closed, and patent stops which dispense with the ordinary screws that are used generally on shutters to stop them when drawn out, and obviate the necessity of any projection inside or outside the dark slide. The advantages are: the shutter is stronger and less liable to breakage; the chance of scratching the negative by the screw stops is done away with; the inner frames require no fitting, there being no projection to allow for.

ELECTRIC BELLS, BATTERIES, &c.

The parts required for fitting up Electric Bells are—
1. The Bell.
2. A Battery to produce the current of electricity.
3. Wire Conductors to convey the electric current from the battery to the bell.
4. Pushes or Pulls, for completing the electric circuit.
5. Indicating Tablets, to show from which room the particular bell has been rung.

IMPROVED ELECTRIC INDICATORS.

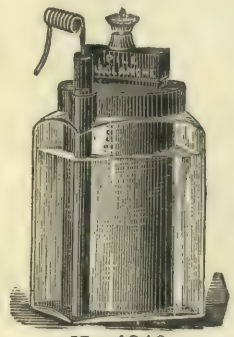

No. 4843.

Mechanical or Electrical Replacement, to indicate from which room the bell has been rung. Each movement is complete on metal base; every part is solid and substantial, connected ready for fixing, and the perfected result of years of experience of every form of Indicator. If the Indicator has bells attached as in Fig. 4843 (arranged to ring for separate entrances, &c.), each bell counts as one number—a six number and three bells thus reckoning as nine numbers. Indicators are made with or without bells, in solid polished mahogany (or other wood if required) cases, with glass dial and gilt lettering.

MAGIC LANTERNS.

TO BURN PARAFFIN OR ANY MINERAL OIL.

No. 4908.

The body of these Lanterns is made of japanned tin, and is so constructed that it also forms part of the lamp, thus *doing away entirely with a Lamp Glass,* which is a very great advantage over all other small Paraffin Lanterns, the glasses of which break so often. The wick of the burner can be turned up from the outside, and the flame can be seen through a small blue glass sight-hole in the side of the lantern body. The chimney of the Lantern is made of Russian iron.

The prices of the Lanterns, complete in neat boxes, with directions for use, are as follows:—

No. 4937. Ditto, with new patent 4-wick lamp, £3 11s. 6d.

The body of this Lantern is made entirely of Russian iron, and rivetted throughout with copper rivets, and with a brass cell for condenser, and the stage and front tube, and sliding O.G. tube, are made of best brass, and mounted on a solid brass foot, making the entire front perfectly rigid, and making it also quite impossible for the front tubes to give in any way. The stage, being open all round, allows slides to be inserted from the top or the sides, which is very useful when chemical experiments are being tried. There is a side door with a blue glass sight-hole for use with the lime light.

The entire brass front and stage slides on the front foot of lantern, which allows the whole of the light from the condenser to be concentrated on the picture, so that no light may be lost even when a small picture is being exhibited.

This Lantern is fitted with a 4-in. plano-convex compound condenser in brass cell, and double combination achromatic front lenses in brass mount (with large size lenses to the back combination), with rack and pinion adjustment, and fitted with a sliding shutter or flasher.

The lamp of this Lantern (either 3-wick or 4-wick) has wicks 2 in. wide, with a very deep reservoir, which will hold sufficient oil for an exhibition of about two hours, which is a great improvement on the ordinary 3 and 4-wick lamps with shallow reservoirs.

OPTICAL LANTERNS, TO BURN PARAFFIN OR ANY MINERAL OIL.

PATENT LANTERNS.—No. 15440.

"THE METAMORPHOSER" (Registered).

TO BURN PARAFFIN OR ANY MINERAL OIL.

No. 4938.

DESCRIPTION OF THE PATENT LANTERNS.

No. 15440. **"THE METAMORPHOSER."** REGISTERED.

The great advantage of this Lantern is, that by means of a **double changing stage, working vertically,** any framed slides (such as rackwork, lever action, changing comic, &c.) can be shown with one Lantern one after another without any interval, thus doing away with the unsightly appearance of the white disc of light seen on the screen while changing the slides in the stage of an ordinary single Lantern.

Another great advantage is, that with this Lantern any mechanical slide can be introduced into a lecture set of photographic slides used with a carrier frame, without taking out the carrier, by simply placing the mechanical slide in the bottom stage, and raising it when required into position, and then lowering the stages again to their former position; without having during the change shown any white light on the screen, which it is impossible to do with an ordinary single Lantern.

The Double Sliding Stage is raised and lowered by a **lever** which enables the operator to either raise it slowly, so as to make the slides exhibited appear like a panorama, or to raise it so quickly that the change from one slide to another is almost imperceptible.

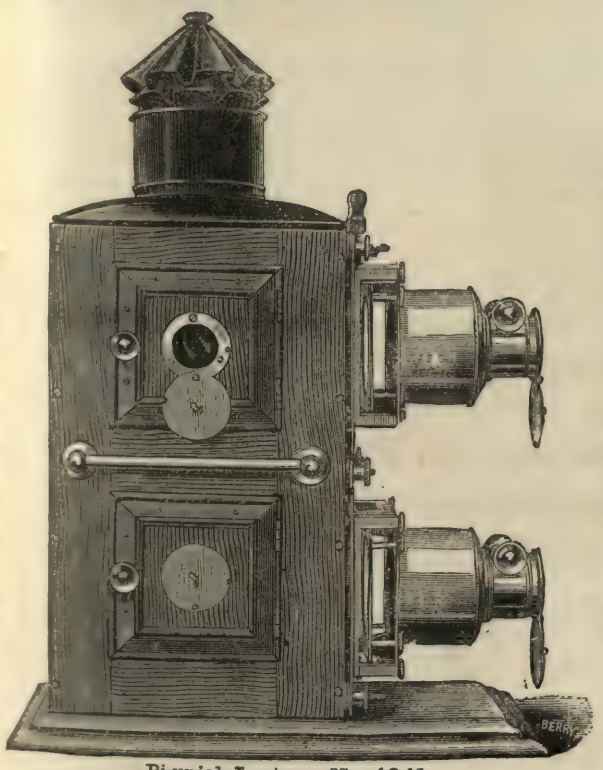

The body of the Lantern is made entirely of Russian iron and rivetted throughout with copper rivets, and the front tube and sliding O.G. tube of solid brass, beautifully finished and lacquered. There is a side door with sight-hole for use with the lime light.

This Lantern is fitted with a 4-inch plano-convex compound condenser in brass cell, and double combination achromatic front lenses in brass mount (with **large size lenses to the back combination**) and **double pinions** to the rack adjustment, and of very superior finish and fitted with a sliding shutter or flasher, having grooves to carry shapes of coloured glass for tinting slides. It has also a new 4-wick lamp, **with wicks 2 inches wide** (placed to form two wedges, thus: W, this preventing the flicker of the wicks, seen on the screen, when they are placed parallel to one another), and a tall jointed Russian iron chimney, with a large oil can and filler. The same Lantern can be made with polished mahogany body with panelled door and brass-bound sight-hole, lined with tin, with Japanned tin dome-shape top, and **with the entire stages and front tubes and supports made in brass, beautifully finished and lacquered,** making a most handsome and solid Lantern for lecturers.

NEW TRIPLE-RACK TELESCOPIC BI-UNIAL AND TRI-UNIAL LANTERNS.

(Patent No. 14809.)

No. 4947. BI-UNIAL LANTERN.

The Body is made of the **finest Spanish Mahogany,** with 4 **Rosewood** panelled and frame moulded doors; each corner is bevelled and inlaid with Rosewood, the back is framed and tongued together, panelled with Rosewood moulding, the cap and base being of the same; the foot is framed and tongued together, and is boldly moulded; the whole highly finished, and guaranteed not to warp by heat or climate. The 4 doors have brass-bound Sight-holes, with Sliding Shutters, and the body has handsome brass rail handles on each side. The body has openings on each side of each Lantern, just behind the Condensers, bound with brass-hinged shutters for inserting a long painted Slide (which is sent with each Lantern), used for tinting plain Photographic Slides from Daylight to Moonlight, giving a very beautiful effect. **Lined** throughout with **Russian Iron,** with **Russian Iron** dome and rose top, and **brass trays** with double supports and binding screws for fixing the jets firmly. The Stages are made **entirely of brass** with brass registering side pieces, of best make and finish, and are fitted with **extra large size Patent Triple-Pack Telescopic** front tubes, and a brass rolling Curtain Effect worked by a **rack and pinion,** giving a perfectly even motion.

The Lantern is fitted with 4-in. diameter Plano and Miniscus Compound Condensers mounted in brass cells, and the front Lenses (4 sets, 8 in all) are Double Combination Achromatic, mounted in brass cylinders, with Sliding Shutters or Flashers (having grooves to carry shapes of coloured glass for Tinting Slides), of the following sizes and focii:—

No. 1 Cylinder has 1⅞-in. diameter double Combination Achromatic Lenses, 4-in. back focus.
No. 2 Cylinder has 2⅜-in. diameter double Combination Achromatic Lenses, 6-in. back focus.
No. 3 Cylinder has 2⅞-in. diameter double Combination Achromatic Lenses, 8-in. back focus.
No. 4 Cylinder has 3⅛-in. diameter double Combination Achromatic Lenses, 10-in. back focus.

All the Cylinders are the same size in diameter, and each one slides into the front of the Triple-Rack, as required. Each cylinder has its focal length engraved on it.

A set of 6 coloured glasses in a leather case, for tinting slides, is sent with each Lantern.

The Lantern is fitted in a very strong stained and French polished dovetailed Cabinet Case, with 2 locks and keys and handles, having at top a hinged board forming a canting table, which is canted by means of two powerful screws, so that the Lantern can be arranged to the greatest nicety. The inside of the Case is fitted with an extra foot, into which the Lantern body is placed, having four rollers running on iron rails, enabling the Lantern to be withdrawn and replaced with the greatest ease. The case has also fittings for all the different parts connected with the Lantern, including a drawer with fittings for carrying all the brass cylinders and condensers.

The great advantages of the Patent Triple-Rack Telescopic Bi-unial Lantern over all other Telescopic Bi-unials are—firstly, that the Telescopic Tubes are **perfectly rigid when racked out to their fullest extent,** and being moved by rack-work, are not liable to work stiffly or to jam in any way; and secondly, that double Combination Achromatic Lenses of different diameters and of different focii, mounted in brass cylinders of different lengths, according to the focus of the lenses, can be inserted, one after another, as required, without having to unscrew anything or alter the Lantern in any way, and the long focus lenses being very large in diameter, more than **twice** the amount of light is obtained than with the ordinary size single Achromatic Lenses usually supplied.

The Lenses with this Lantern are the same as in Quarter-plate, Half-plate, Three-quarter-plate, and Whole-plate Photographic Portrait Lenses, which are the best for long and short distances, giving the best results it is possible to obtain.

The Triple-Rack Telescopic Front Tubes of the above Lantern, together with the 2 sets of 4 double Combination Achromatic Lenses, can be supplied to any existing Bi-unial Lantern, with Brass Stages and Front Tubes, at **£28 7s. 0d.** the pair.

Should the above Lantern be required with only one, two, or three sets of the Lenses, the allowance will be for the—

Any of the Cylinders not ordered at the same time as the Lantern can always be added afterwards, as they are all made to gauge.

No. 4948. TRI-UNIAL LANTERN.

This Lantern is exactly the same in make and finish as the Patent Triple-Rack Telescopic Bi-unial with the addition of a Top Lantern, forming a Tri-unial.

The Top Lantern is made to detach, and an extra base-board is supplied, so that it can be used as a single Lantern. There is also an extra Russian Iron Dome and Rose Top, for use when the Bi-unial portion only is required.

The Top Lantern has a pair of handsome brass rail handles, in addition to those on the Bi-unial portion, and the back of the Lantern is fitted with brass tube supply pipes, for connecting the gases with the dissolving taps.

The 3 sets of 4 double Combination Achromatic Lenses are the same size and focus as those sent with the Patent Triple-Rack Telescopic Bi-unial, and are mounted in the same way with sliding shutters or flashers.

The Lantern is fitted in a strong Cabinet Case, with locks and keys and handles.

The Triple-Rack Telescopic Front Tubes of the above Lantern, together with 3 sets of 4 double Combination Achromatic Lenses, can be fitted to any existing Tri-unial Lantern, with brass stages and front tubes, at **£42 10s. 6d.** the three sets.

Should the above Lantern be required with only one, two, or three sets of the Lenses, the allowance will be for the—

OPTICAL LANTERN OBJECTIVES.

With Rack and Pinion Adjustment for short and long focus Double Combination Achromatic Lenses.

The above Optical Lantern Fronts are of best make and finish, with double pinions to the rack adjustment, and so constructed that brass cylinders, carrying short and long focus double combination lenses can be used. Each brass cylinder is fitted with a new shape hinged instantaneous shutter or flasher, having grooves to carry shapes of coloured glass for tinting slides, and has the focal length engraved on it, and is fitted with Double Combination Achromatic Lenses, with large size lenses to the back combination.

These lenses are a very great improvement on the old single achromatic lenses, and they can be fitted to any lantern that has telescopic draws, or to any lantern without telescopic draws by the addition of brass lengthening tubes.

Four brass cylinders can be had with each front, of the following focii :—

No. 1 Cylinder, 4½-in. back focus. | No. 3 Cylinder, 9-in. back focus.
No. 2 „ 6½-in. „ | No. 4 „ 11-in. „

The cylinders can be changed in a moment, without unscrewing the front from the nozzle of lantern.

No. 4951. Price of front, with double pinions to the rack adjustment, each 16/3.

No. 4952. Price of brass cylinders, with double combination achromatic lenses, with large size lenses to the back combination, and fitted with new shape hinged shutter or flasher, and having grooves to carry shapes of coloured glass for tinting slides, each 16/3.

The above cylinders can be had with either the hinged instantaneous shutters or flashers, or with the sliding shutters or flashers, as desired.

No. 4953. Set of 6 coloured glasses, fitted in a leather case, for tinting slides, for the above cylinders, price per set, 2/3.

WATCH MATERIALS AND TOOLS

FOR

WATCHMAKERS, JEWELLERS, AND ENGRAVERS.

The arrangements we have made with some of the best—we may almost say the best—manufacturers of Watch Materials and Tools enable us to sell first-class articles at most reasonable prices. As the value of each article is comparatively small, it is, in all cases, to our interest, as well as to that of those who use these goods, to supply only the best article procurable.

When perusing the pages of our Watch Materials and Tools, the complete assortment there illustrated and priced will most probably satisfy you that we have endeavoured to, and we believe have succeeded in, showing and pricing all the articles requisite for the trader in these materials to properly assort his stock and supply his wants, and also to furnish every practical Watchmaker with every requisite of his trade.

We are prepared to allow an extra discount upon all orders received by us for large quantities of any particular article, as in such cases the manufacturers would make us a similar concession.

We beg to draw your special attention to page 345, on which we show three different assortments of the materials required to stock a Watchmaker's bench. The three assortments vary, as you will observe, not so much in the quantity of each article, as in the greater assortment as required by a Watchmaker, according to the place, situation, and size of the workshop in which he carries on his business.

The following useful articles of

JEWELLERS' MATERIALS,

Suitable for the Jobbing Trade,

stitched on Cards, can be recommended:—

THE CIGAR WALKING STICK.

LATEST NOVELTY.

QUITE NEW FOR THIS SEASON.

INSTRUCTIONS FOR USE.

THE Stick when full will hold from eight to nine Cigars. To fill it, open the lid and push the Cigars gently down the hole, point upwards, taking care that they are not larger than the tube will easily take. When a Cigar is required, turn the milled edge ring **A** to the left, and the Cigar will come up. Always take care to have the Cigar well up on the top to touch the inside of the cover, as shown in the drawing. This keeps the Cigars in place and prevents them shaking. When one Cigar has been removed, the ring **A** must be turned until the next Cigar has been brought to the top, when the lid is closed.

The Sticks are made in various sizes for Cigars and Cigarettes and in all woods that permit of being bored.

No. 8727. India-rubber Elastic Force Cup.

For instantly clearing the Discharge Pipes of Lavatory Wash Basins, Slipper Baths, Kitchen Sinks, &c., when they become partially or entirely stopped.

PRICE 24/- per dozen.

EXPLANATION.

A is a rubber cup; **B** is a handle of wood; **C** is an iron disc. A screw passes from the rubber cup to the handle, thus holding the three pieces securely together, as shown in cut.

In using this force cup, allow water to flow into the bowl or tub to a depth of three or four inches; the india-rubber cup is then placed directly over the vent, and the handle is forced up and down three or four times with a quick motion. The water beneath the cup is thus forced into the discharge pipe with a succession of sudden impulsions, which dislodges the obstruction and forces it through the pipe.

ACCOUNT BOOKS.

The success which attended the issue of our last Catalogue of Account Books and Stationery, and the rapid growth of this department, has induced us to add to our business a Manufactory for these goods, which has now been established over Three Years. We have, therefore, every facility for turning out large orders at the shortest possible notice. The prices quoted in the following List are based upon the best materials and the highest class of skilled workmanship and finish. In fact, throughout all the goods manufactured by us, from the very lowest in price up to the best Account Books, we maintain this high-class standard quality; which we judge, from the ever increasing demand for our goods, is fully appreciated by those who are induced to place their orders with us.

PORTABLE COPYING PRESSES.

No. 10835. Made of polished mahogany, with brass mountings and nickel-plated steel fittings. The portability and small dimensions of this Press make it at once suitable for travellers, officers of ships, and private use generally, while its elegant appearance and efficiency make it a most desirable and useful addition to the study or library; price, 17/6 each; with book complete, 20/- each.

No. 10836. The Effective Office Copying Press. This Press is a combination of screw and levers, and, having all the parts made of steel, with the exception of the platen and sole, it is the strongest and most powerful copying press ever introduced; it also takes up less space than the ordinary press, and when the handle is removed—which can be done and replaced by anyone in a second or two—it can be packed so as to occupy very little space, which is of importance for exporting. Made in sizes, quarto, 52/6; folio, 62/6; royal, 92/6 each.

No. 10837. Portable Copying Press; size, quarto, 9½ by 11½ in.; made in japanned iron and polished mahogany boards, with iron stays to prevent warping, accommodating any thickness of 500-leaf letter book; price 6/- each, or, with 500-leaf letter book, 7/9 each.

The "EUREKA" INTENSE BLACK NON-CORROSIVE INK. (Registered.)

This Writing Ink though of a purplish tint in the inkstand, is intensely black almost at the instant of leaving the pen, and is exceedingly pleasant to use. No sediment and no incrustation on the pen. It is the most permanent of the Dichromatic Inks, and possesses the advantage—which is unique—of combining so quickly with the paper that the intensity of the colour is but slightly lessened by the immediate application of the blotting pad.

ILLUSTRATED BOOKLETS AND GIFT BOOKS.

SUITABLE FOR CHRISTMAS, NEW YEAR, EASTER, AND BIRTHDAY MEMENTOES.

We would call your special attention to the Illustrated Booklets shown on the preceding page. These are comparatively modern productions, but judging from the large and increasing sale already achieved, we venture to predict, with some degree of confidence, a very successful future.

These form an excellent auxiliary to Birthday, Easter, Christmas, and New Year Cards, and for each of these Seasons entire novelties are produced.

The illustrations on the preceding page indicate but a few of the leading Numbers published at the present moment; our friends may rely upon receiving, in execution of their orders, the latest publications and most popular works as may be introduced from time to time.

The poetry or prose in each of these booklets is written by eminent authors, and is of the highest merit.

The Books are profusely illustrated; the drawing of the designs and the printing, whether in colours or mono-tint, being executed in most artistic style.

The covers of the Books are beautifully lithographed, and wrapped in a printed outer cover, thus affording full protection to the goods for purposes of Home or Foreign postage.

All Booklets are 13 copies to the dozen.

These goods vary from 2/8 per dozen copies to 4/2 each.

For many years past we have made a very careful study of this class of goods; and the results achieved amply justify us in believing that we have accurately gauged the taste of the general public.

Our assortment comprises the best numbers of the leading publishers of the season; but by far the greater number of patterns shown in our establishment are novelties which we ourselves have designed, and which, therefore, are exclusively to be had from us.

For the convenience of buyers who require a full variety of cards at a comparatively small outlay, and who wish to economise time, we have arranged a series of glass-top Display Cases with illuminated show-card, details of which are appended. The cards of the current season are supplied, and the full value given of same, the show-case being quite gratis. These cases may be supplied with Christmas, New Year, Birthday, or Easter Cards, or, if desired, with assorted Cards. Kindly specify when ordering which selection you prefer.

JUDSON'S HOUSEHOLD SPECIALITIES—(*Continued*).

Judson's Sponges on Cards.

It is a well-known fact that retailers of sponges who buy them by the case very often lose money by them, or at best do not know what they make out of them.

We are therefore laying ourselves out to supply sponges of various sizes, mounted on attractive cards, showing a good profit to both wholesale and retail.

These sponges, mounted on cards (lithographed in red and black), have a striking effect when displayed in a window.

No. 12058.—THE "IN STATU QUO" CHESS BOARD.

This invention supplies a want felt by all Chess players. The "In Statu Quo" Chess Board is so contrived that the game may at any time be discontinued, and the Board folded and placed in its case without the Chessmen being disturbed. For ordinary play, as well as for sea or railway use, this Board has obvious advantages not possessed by any other hitherto offered to the public.

Care must be taken before closing the Board to observe the Second Rule.

DIRECTIONS FOR USE.

1. The Board being opened, the Chessmen are instantly released by pressing the red and white ivory pins projecting from the internal edge of the frame.

2. When it is proposed to postpone or discontinue the game, the Chessmen may be immediately secured on their respective squares by pressing inward the two ivory pins placed on the external edges of the frame.

INDISPENSABLE TO CHESS PLAYERS.

INDIA-RUBBER CHESS PRINTER

For recording Problems, unfinished Games, interesting Positions during actual play, &c. 27/- per doz.

In handsome polished wood box, about the size of a cigar case, very portable and convenient for pocket use. The printing is produced by India-rubber dies, which are fixed upon the bevelled edge of small mounts or holders, enabling the user to print the impression accurately and readily upon the requisite square of the diagram. As will be seen from the illustration, there are twelve mounts—six white and six black—representing the King, Queen, Bishop, Knight, Rook, and Pawn. These mounts fit into slots in the centre compartment of the box, and directly over each slot an impression of the piece is affixed, so that it can be instantly identified. The Pad, being self-inking, is always ready for use, and as it does not require inking or attention, there is therefore no danger of soiling the fingers or leakage. A Book containing twelve diagrams is also supplied with each box, and fits inside the lid. Additional books can always be obtained.

The Chess Printer can also be used for printing Draught problems by the addition of two pieces, representing white and black Draughtsmen, which are supplied at an extra cost of 6d.

No. 13717.

GERMAN PIANOFORTES (Best Make).

These instruments are of the newest and most approved construction, finished in the highest and most perfect manner possible. As they are of the very best materials and finest workmanship, the tone is entirely free from metallic sound, and is very rich, full, and mellow; the touch is easy, rapid, and elastic; while the speciality of the instruments enables them to stand the changes of the most trying climates. The hammers are covered with one thickness of felt only, and secured by metal pins. The frames are made of the best iron, and the best check action is used in all instruments.

American Organs.

(Black Walnutwood Cases.)

The above drawings represent the general style of cases. They vary as new designs are being constantly added. In executing an order, we always send the latest design. The cases are made of solid walnutwood, and the best materials only are used. The quality of tone is as near as possible to the pipe organ, at the same time being sweet and mellow, and the touch all that can be desired.

The funnel-shaped raised cup "A," with over-lapping edges or flange, absolutely prevents the poisonous nicotine from entering the mouth, and also the saliva from the mouth reaching the bowl. The Mouthpiece, being made in TWO Distinct Parts, can be instantly cleansed by simply unscrewing the projecting portion of the stem "B." No noxious or unpleasant properties of the tobacco can possibly reach the mouth, rendering expectoration absolutely unnecessary, the pipe remaining always sweet.

NOTE.—The Projecting Portion from "B" Unscrews.

The following are the advantages of the new system of lighting:—

1. Passengers are able to read with ease and comfort in every part of the compartment.
2. The light is not affected by currents of air, even when travelling at the highest speed.
3. There is no overflow of oil into the glass, as the oil container is below the flame, instead of above it, as in the ordinary lamp, and no glass chimney of any kind is employed.
4. The lamp is constructed to burn for 18 hours or more, as on the Great Northern Suburban Lines, where the lamps have been very successful, being lighted at 7 o'clock one morning, and burning until 1 o'clock the next morning without being re-filled or re-trimmed.
5. The trimming and cleaning of the lamp occupy less tim ethan with those in general use.
